FumaTech®
FUMAGALLI POLES TECHNOLOGY

Fumatech technology grants to our lamps the same strength features of a metal post, combined with all the advantages in terms of rust and corrosion resistance that only a resin material can offer.

METAL POST COVERED RESIN
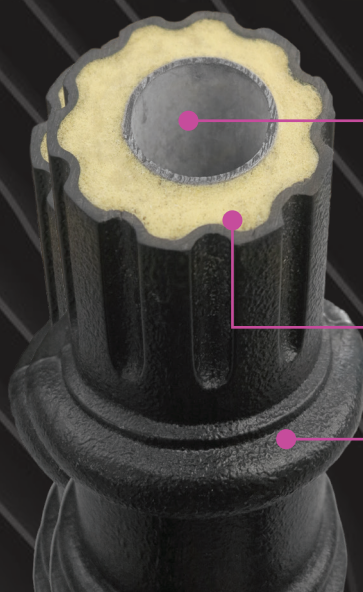

1 INNER METAL POLE STRUCTURE
Structural metal pole hot deep galvanized inside and outside by zinc bath immersion.

2 EXPANSE
High Density rigid polyurethane provides lightweight and durable cohesion between the inner metal post and the outer resin cover.

3 OUTER RESIN COVER
Outer coating of a single piece without joints made of shockproof resin material.
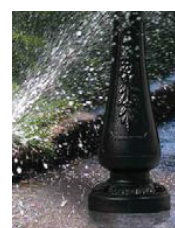

Product Advantages

Anti Corrosion	Maintenance Free	UV-Rays Stabilized	Safe to Touch	Unaffected By Chemicals
