

BLUSODA

For Home and Office, Blusoda is Compact and Delivers Professional-Level Performance.

With its functional design, Blusoda delivers great performance in a small space: it can dispense cold still water, cold sparkling water, at-room temperature and hot water up to 85°C (Hot version) for the preparation of infusions and teas.

Antibacterial protection systems

The UVC Led Out lamps sterilize water, preventing the proliferation of bacteria, viruses and micro organisms.

I.T. Inox Touch

The stainless touch buttons offer a superior user experience in terms of performance and cleanliness.

Available Version:

Hot Version

Ideal to meet the daily needs of hot drinks such as tea, coffee, soups and other preparations that require hot water.

To ensure user safety, the Hot version is equipped with LED buttons that provide safety warnings.

Touch Free Version

Maximum hygiene and cutting-edge technology thanks to infrared rays.

To dispense, simply place your finger 1.5cm away from the panel and hold it until the end of dispensing.

Model	Lt/h	Dimension W x D x H(mm)	Weight (kg)	Dispensing area (mm)	Fizz	Ambient	Cold	Hot

Bluesoda 45 Fizz	45	318 x 499 x 470	31	329	●	●	●	

TAPS & BOX

At home and in the office, in bars, restaurants, and... everywhere! Blupura BOX models can be connected with either taps or advanced dispensing heads, thus making them the perfect solution for those seeking high performance and advanced functionality in a compact solution, yet preferring to “hide” the core of the dispenser for space or style reasons.

bluglass Tower

The perfect choice for anyone with limited space, who loves design and who doesn't want to compromise on the performance of a professional tap.

It can be equipped with Portion Control and the standard drip tray is already set up to be connected to the drain without the need for further holes.

BLU Tower

Complete with portion control and made entirely from stainless steel (including the buttons), it can be combined with any type of undercounter model.

It dispenses two types of water: cold still and sparkling, or cold water and room-temperature water.

Box 60

The under counter that offers a continuous supply of 18 litres of water and that can be combined with any type of tap.

The three dispensing options include cold water, room temperature water and sparkling water, while hot water is available in the HOT version.
