Fumatech technology grants to our lamps the same strength features of a metal post, combined with all the advantages in terms of rust and corrosion resistance that only a resin material can offer.

FUMAGALLI POLES TECHNOLOGY

- 1 INNER METAL POLE STRUCTURE**
Structural metal pole hot deep galvanized inside and outside by zinc bath immersion.
- 2 OUTER RESIN COVER**
Outer coating of a single piece without joints made of shockproof resin material:
 - Rust and corrosion-free
 - Paste molded colors, UV stabilized
 - Self-extinguishing on fire
- 3 EXPANSE**
High Density rigid polyurethane provides lightweight and durable cohesion between the inner metal post and the outer resin cover.
